

Summer Internships at DCE

All 1st and 2nd Year students interested in doing summer internship at the TIFAC-CORE laboratory at DCE are invited to send their resumes along with most recent college results to the undersigned by 31st March 2009. If selected, you will be working under Prof. R.K.Sinha.

The TIFAC—LAB @ DCE specializes in optoelectronics and optical communication, the following topics will be taken as research assignments during the summer, please mention your field of interest in your email.

- Optical Communication
- Silicon Photonics
- Quantum Computing
- Bio-Medical Optics
- Photonic Crystal Fibers
- Plasmonics
- Optical Networking
- Green Photonics (Solar Energy)

We suggest you research your choice before taking it up, so as to give yourself an idea of what you will be doing.
